

LEUCOVORIN CALCIUM FOR INJECTION

EVORON[®]

Leucovorin Calcium for Injection
50mg, 100mg, 200mg and 350mg/vial as
Lyophilized powder

EVORON[®] - Leucovorin Calcium for Injection rescue is indicated after high dose methotrexate therapy in osteosarcoma. EVORON[®] - Leucovorin Calcium for Injection is also indicated to diminish the toxicity and counteract the effects of impaired methotrexate elimination and of inadvertent overdosages of folic acid antagonists. EVORON[®] - Leucovorin Calcium for Injection is indicated in the treatment of megaloblastic anemias due to folic acid deficiency when oral therapy is not feasible. EVORON[®] - Leucovorin Calcium for Injection is also indicated for use in combination with 5-fluorouracil to prolong survival in the palliative treatment of patients with advanced colorectal cancer. EVORON[®] - Leucovorin Calcium for Injection should not be mixed in the same infusion as 5-fluorouracil because a precipitate may form.
