Lautress Sublingual
® Tablets
(Buprenorphine and Naloxone) (CIII)
TREATMENT FOR: OPIATE DEPENDENCE

Lautress® (buprenorphine and naloxone) sublingual tablet (CIII) is a prescription medicine used to treat adults who are addicted to opioid drugs (either prescription or illegal) as part of a complete treatment program that also includes counseling and behavioral therapy.

Treatment for: Opiate Dependence

Lautress (buprenorphine and naloxone) is a sublingual partial opioid agonist indicated for the maintenance treatment of opioid dependence.

Indication

Lautress (buprenorphine and naloxone) sublingual tablets (CIII)

- Lautress is a medication for adults with opioid dependence
- Lautress should be used as part of a complete treatment plan that also includes counseling and behavioral therapy.

Lautress delivers the same concentration of active medication as previously approved **buprenorphine/naloxone sublingual (dissolves under the tongue) formulations.**

Lautress is a controlled substance (CIII) because it contains buprenorphine, which can be a target for people who abuse prescription medicines or street drugs. Keep your Lautress in a safe place to protect it from theft. Never give your Lautress to anyone else; it can cause death or harm them. Selling or giving away this medicine is against the law

Lautress is available in 2 doses:

Individually sealed in the highest level of child-resistant unit-dose blister packs (F1 child-resistant)

- 5.7-mg/1.4-mg buprenorphine/naloxone, round tablet
- 1.4-mg/0.36-mg buprenorphine/naloxone, round tablet

Food and Drug Administration (FDA) approved .Prescription Only (POM)
