What Is Livoral® (Adementionine) 400mg Tablets?

Ademetionine is a form of the amino acid methionine. It also is called S-adenosylmethionine, or SAME. Typically, a human body makes all the ademetionine it needs for good health. However, low levels of methionine, folate, or vitamin B12 can cause a drop in ademetionine levels. Since this chemical doesn't exist in foods, a synthetic version is sometimes used to normalize levels in the body.

Livoral® (Adementionine) 400mg Tablets is sold as a dietary supplement in the United States. In Europe, it is used as a prescription drug.

What Does Livoral® (Adementionine) 400mg Tablets Do?
