Noflicar and Noflicar HCT have been proven to help lower high blood pressure in clinical trials. Although there was some level of variation in blood pressure response, the overall blood pressure lowering effect of Noflicar taken once a day was maintained throughout the 24-hour period.

 **Noflicar**  
(Olmesartan Medoxomil)  
TABLETS

 **Noflicar HCT**  
(Olmesartan Medoxomil-Hydrochlorothiazide)  
TABLETS

Treatment for: Noflicar (olmesartan) is an angiotensin II receptor antagonist. Olmesartan keeps blood vessels from narrowing, which lowers blood pressure and improves blood flow.

Noflicar is used to treat high blood pressure (hypertension) in adults and children who are at least 6 years old. It is sometimes given together with other blood pressure medications.

 **Noflicar**  
(Olmesartan Medoxomil)  
TABLETS

 **Noflicar HCT**  
(Olmesartan Medoxomil-Hydrochlorothiazide)  
TABLETS

Noflicar & Noflicar HCT is **an angiotensin II receptor blocker (ARB) indicated** for the treatment of hypertension, alone or with other antihypertensive agents, to lower blood pressure. Lowering blood pressure reduces the risk of fatal and nonfatal cardiovascular events, primarily strokes and myocardial infarctions.  
**Noflicar & Noflicar HCT helps blood vessels relax and widen, which helps lower blood pressure.**

#### INDICATIONS >>

Noflicar and Noflicar HCT are prescription medicines used to lower high blood pressure (hypertension). They may be used alone or with other medicines used to treat high blood pressure. Noflicar HCT is not for use as the first medicine to treat high blood pressure. Noflicar HCT® may be administered with other antihypertensive agents

Do not take Noflicar or Noflicar HCT if you:  
Take medicine that contains aliskiren and you have diabetes or kidney problems  
Do not take Noflicar HCT if you:  
Have less urine than normal or if you cannot urinate  
Are allergic to other sulfonamide type medicines  
Have severe kidney disease

Understand how they work and you'll understand why they have been shown to work.  
The reason why Noflicar and Noflicar HCT can help lower your uncontrolled high blood pressure is the way that they work.  
Both Noflicar and Noflicar HCT have a specific medical agent designed to block angiotensin II, a natural chemical in your body that can raise blood pressure by causing blood vessels to tighten and narrow.  
By blocking this specific chemical both Noflicar and Noflicar HCT help lower blood pressure by helping your blood vessels relax and widen.  
Noflicar HCT also adds a medicine that decreases water content, since retaining too much water can raise blood pressure.

How Noflicar and Noflicar HCT work best.  
Noflicar and Noflicar HCT work most effectively when you take them exactly as your doctor prescribes:  
Once a day, every day / With or without food / At the same time every day  
Alone or with other drugs that treat high blood pressure  
**Available strengths:** Noflicar Tablets: 5 mg, 20 mg, and 40 mg  
Noflicar HCT : 40 mg/12.5 mg & 40 mg/25 mg.

**Food and Drug Administration (FDA) approved .Prescription Only (POM)**
