NORVELZO[®]
BORTEZOMIB FOR INJECTION

**NORVELZO is used to treat multiple
myeloma and mantle cell lymphoma.**

NORVELZO[®] (BORTEZOMIB FOR INJECTION) for Injection is an antineoplastic agent available for intravenous injection or subcutaneous use. Each single use vial contains 3.5 mg of bortezomib as a sterile lyophilized powder.
Inactive ingredient: 35 mg mannitol, USP.

Bortezomib is a modified dipeptidyl boronic acid. The product is provided as a mannitol boronic ester which, in reconstituted form, consists of the mannitol ester in equilibrium with its hydrolysis product, the monomeric boronic acid. The drug substance exists in its cyclic anhydride form as a trimeric boroxine.
